

103 LT STEEL CYLINDER

The 103LT steel cylinder is ideally suited for non- reactive gas use. In addition, steel cylinders are often specified for use in mines and other explosive atmospheres. This cylinder is designed to hold approximately 103 liters of gases. This tough cylinder is durable and easy to carry around. It is fitted with a C10 valve.

Characteristic	
Gas Type	Non-Reactive
Contents	103 liters
Pressure	69 Bar (1000 Psig)
Dimensions	345mm x 83mm (13 1/2" x 3 1/4")
Weight	1.4 kg (3 lb)
Material	Steel

Specifications			
Approvals	Fill Type	Valve Inlet	Recommended Equipment
Global	Non-Refillable	5/8"-18 UNF (C10)	Most commonly used regulators include the brass: fixed flow C10, Demand Flow & Dial A Flow
