

Self Contained Breathing Apparatus (SCBA)

Aplus A1000

The APLUS A1000 is a breathing apparatus (SCBA) model focus on customers looking for a simple, light weight, economical model. A1000 light weight design and carbon composite cylinder is a top choice for user looking for easy to carry SCBA compared to heavier models. It is suitable for rescue, compliance, confined space and other industrial applications.

Aplus A1000

1. Drag rescue device (DRD) for easy rescue of any man down

2. Anti-static impact resistant light weight space frame

3. HP/MP hoses tucked away neatly to prevent tearing and abrasion

4. Reflective shoulder indicators

5. Hard wearing flame retardant webbing

6. Rapid quick coupling – able to customize for dual users

7. Comfortable weight bearing padding

8. Rubber gauge cover impact protection

9. Glow-in-the-dark cylinder for low-light visibility

10. Lightweight and flame retardant buckles

Aplus A1000 Technical Data

Aplus A1000 Self Contained Breathing Apparatus (SCBA)

Weight (backplat & harness)	Approx. 8kg	Full-face Mask	Pano type
Dimensions	490(h) x 280(w) x 170(d)mm	Speaking diaphragm	Yes
Cylinder Type	Carbon composite	Type of head hardness	5 points rubber
Cylinder Capacity	6.8L	Type of pressure gauge	Pneumatic
Working pressure	300 bar/4500 Psi	Standard	EN137 Type II
